

## Appendix: AAA Task Force on Central Presbycusis

### Reading List

#### Speech in Steady State Noise

Dubno, J.R., Ahlstrom, J.B., & Horwitz, A.R. (2000). Use of context by young and aged adults with normal hearing. *Journal of the Acoustical Society of America*, 107(1), 538-546.

Hällgren, M., Larsby, B., Lyxell, B., & Arlinger, S. (2001). Evaluation of a cognitive test battery in young and elderly normal-hearing and hearing-impaired persons. *Journal of the American Academy of Audiology*, 12, 357-370.

Humes, L. E., Burk, M.H., Coughlin, M.P., Busey, T.A., & Strauser, L.E. (2007). Auditory speech recognition and visual text recognition in younger and older adults: similarities and differences between modalities and the effects of presentation rate. *Journal of Speech, Language, and Hearing Research*, 50(2), 283-303.

Van Rooij, J.C.G.M. & Plomp, R. (1989). Auditive and cognitive factors in speech perception by elderly listeners. I: Development of test battery. *Journal of the Acoustical Society of America*, 86(4), 1294-1309.

Van Rooij, J.C.G.M. & Plomp, R. (1990). Auditive and cognitive factors in speech perception by elderly listeners. II: Multivariate analyses. *Journal of the Acoustical Society of America*, 88(6), 2611-2624.

#### Speech in Competing Speech

Abel, S. M., Krever, E.M., & Alberti, P.W. (1990). Auditory detection, discrimination and speech processing in aging, noise-sensitive and hearing-impaired listeners. *Scandinavian Audiology*, 19(1), 43-54.

Dubno, J., Lee, F., Matthews, & L., Mills, J. (1997). Age-related and gender-related changes in monaural speech recognition. *Journal of Speech and Hearing Research*, 40, 444-452.

Dubno, J.R., Lee, F.S., Matthews, L.J., Ahlstrom, J.B., Horwitz, A.R., & Mills, J.H. (2008). Longitudinal changes in speech recognition in older persons. *Journal of the Acoustical Society of America*, 123(1), 462-475.

Gennis, V., Garry, P.J., Haaland, K.Y., Yeo, R.A., & Goodwin, J.S. (1991). Hearing and cognition in the elderly. *Archives of Internal Medicine*, 151, 2259-2264.

Humes, L. E., Lee, J.H., & Coughlin, M.P. (2006). Auditory measures of selective and divided attention in young and older adults using single-talker competition. *Journal of the Acoustical Society of America*, 120(5 Pt 1), 2926-2937.

Murphy, D. R., McDowd, J.M., & Wilcox, K.A. (1999). Inhibition and aging: similarities between younger and older adults as revealed by the processing of unattended auditory information. *Psychology and Aging*, 14(1), 44-59.

Murphy, D.R., Daneman, M., & Schneider, B.A. (2006). Why do older adults have difficulty following conversations? *Psychology and Aging*, 21(1), 49-61.

Pichora-Fuller, M.K., Schneider, B.A., & Daneman, M. (1995). How young and old adults listen to and remember speech in noise. *Journal of the Acoustical Society of America*, 97(1), 593-608.

Schum, D. J. & Matthews, L.J. (1992). SPIN test performance of elderly hearing-impaired listeners. *Journal of the American Academy of Audiology*, 3(5), 303-307.

Snell, K. B., Mapes, F.M., Hickman, E.D., & Frisina, D.R. (2002). Word recognition in competing babble and the effects of age, temporal processing, and absolute sensitivity. *Journal of the Acoustical Society of America*, 112(2), 720-727.

Souza, P.E., & Turner, C.W. (1994). Masking of speech in young and elderly listeners with hearing loss. *Journal of Speech and Hearing Research*, 37, 655-661.

Wiley, T. L., Cruickshanks, K.J., Nondahl, D.M., Tweed, T.S., Klein, R., & Klein, B.E.K. (1998). Aging and word recognition in competing message. *Journal of the American Academy of Audiology*, 9(3), 191-198.

#### Speech: Informational Masking

Sommers, M. S. (1997). Stimulus variability and spoken word recognition. II. The effects of age and hearing impairment. *Journal of the Acoustical Society of America*, 101(4), 2278-2288.

#### Speech: Binaural Advantage

Dubno, J. R., Horwitz, A.R., & Ahlstrom, J.B. (2002). Benefit of modulated maskers for speech recognition by younger and older adults with normal hearing. *Journal of the Acoustical Society of America*, 111(6), 2897-2907.

Dubno, J. R., Ahlstrom, J.B., & Horwitz, A.R. (2008). Binaural advantage for younger and older adults with normal hearing. *Journal of Speech Language and Hearing Research*, 51, 539-556.

Helfer, K. S. (1992). Aging and the binaural advantage in reverberation and noise. *Journal of Speech and Hearing Research*, 35(6), 1394-1401.

## Speech: Dichotic Listening

Humes, L. E., Lee, J.H., & Coughlin, M.P. (2006). Auditory measures of selective and divided attention in young and older adults using single-talker competition. *Journal of the Acoustical Society of America*, 120(5 Pt 1), 2926-2937.

Jerger, J., Chmiel, R., Allen, J., & Wilson, A. (1994). Effects of age and gender on dichotic sentence identification. *Ear and Hearing*, 15(4), 274-286.

Martini, A., Bovo, R., et al. (1988). Dichotic performance in elderly Italians with Italian stop consonant-vowel stimuli. *Audiology*, 27(1), 1-7.

Noffsinger, D., Martinez, C.D., & Andrews, M. (1996). Dichotic listening to speech: VA-CD data from elderly subjects. *Journal of the American Academy of Audiology*, 7(1), 49-56.

Roup, C., Wiley, T., & Wilson, R. (2006). Dichotic word recognition in young and older adults. *Journal of the American Academy of Audiology*, 17, 230-240.

Wilson, R. H. & Jaffe, M.S. (1996). Interactions of age, ear, and stimulus complexity on dichotic digit recognition. *Journal of the American Academy of Audiology*, 7(5), 358-364.

## Speech: Time-Compressed Speech

Gordon-Salant, S., & Fitzgibbons, P.J. (1993). Temporal factors and speech recognition performance in young and elderly listeners. *Journal of Speech and Hearing Research*, 36, 1276-1285.

Gordon-Salant, S. & Fitzgibbons, P.J. (2004). Effects of stimulus and noise rate variability on speech perception by younger and older adults. *Journal of the Acoustical Society of America*, 115(4), 1808-1817.

Humes, L. E., Burk, M.H., Coughlin, M.P., Busey, T.A., & Strauser, L.E. (2007). Auditory speech recognition and visual text recognition in younger and older adults: similarities and differences between modalities and the effects of presentation rate. *Journal of Speech, Language, and Hearing Research*, 50(2), 283-303.

Jenstad, L. M. & Souza, P.E. (2007). Temporal envelope changes of compression and speech rate: combined effects on recognition for older adults. *Journal of Speech, Language, and Hearing Research*, 50(5), 1123-1138.

Letowski, T. & Poch, N. (1996). Comprehension of time-compressed speech: effects of age and speech complexity. *Journal of the American Academy of Audiology*, 7(6), 447-457.

Schneider, B.A., Daneman, M., & Murphy, D.R. (2005). Speech comprehension difficulties in older adults: Cognitive slowing or age-related changes in hearing? *Psychology and Aging*, 20(2), 261-271.

Stollman, M. H. & Kapteyn, T.S. (1994). Effect of time scale modification of speech on the speech recognition threshold in noise for elderly listeners. *Audiology*, 33(5), 280-290.

Tun, P. A. (1998). Fast noisy speech: age differences in processing rapid speech with background noise. *Psychology and Aging*, 13(3), 424-434.

Vaughan, N. E. & Letowski, T. (1997). Effects of age, speech rate, and type of test on temporal auditory processing. *Journal of Speech, Language, and Hearing Research*, 40(5), 1192-1200.

Versfeld, N. J. & Dreschler, W.A. (2002). The relationship between the intelligibility of time-compressed speech and speech in noise in young and elderly listeners. *Journal of the Acoustical Society of America*, 111(1 Pt 1), 401-408.

Wingfield, A., McCoy, S.L., Peelle, J.E., Tun, P.A., & Cox, L.C. (2006). Effects of adult aging and hearing loss on comprehension of rapid speech varying in syntactic complexity. *Journal of the American Academy of Audiology*, 17(7), 487-497.

#### Speech: Reverberant Speech

Halling, D. C. & Humes, L.E. (2000). Factors affecting the recognition of reverberant speech by elderly listeners. *Journal of Speech and Hearing Research*, 43, 414-431.

Humes, L. & Christopherson, L. (1991). Speech identification difficulties of hearing-impaired elderly persons: the contributions of auditory processing deficits. *Journal of Speech and Hearing Research*, 34, 686-693.

Helfer, K. S. & Huntley, R.A. (1991). Aging and consonant errors in reverberation and noise. *Journal of the Acoustical Society of America*, 90(4 Pt 1), 1786-1796.

Helfer, K. & Wilbur, L. (1990). Hearing loss, aging, and speech perception in reverberation and noise. *Journal of Speech and Hearing Research*, 33, 149-155.

#### Speech: Speech in Fluctuating Noise

Dubno, J. R., Horwitz, A.R., & Ahlstrom, J.B. (2002). Benefit of modulated maskers for speech recognition by younger and older adults with normal hearing. *Journal of the Acoustical Society of America*, 111(6), 2897-2907.

Larsby, B., Hällgren, M., Lyxell, B., & Arlinger, S. (2005). Cognitive performance and perceived effort in speech processing tasks: Effects of different noise backgrounds in normal-hearing and hearing-impaired subjects. *International Journal of Audiology*, 44, 131-143.

#### Speech: Other

Bryan, J. & Luszcz, M.A. (2000). Measurement of executive function: considerations for detecting adult age differences. *Journal of Clinical and Experimental Neuropsychology*, 22(1), 40-55.

Chmiel, R. & Jerger, J. (1996). Hearing aid use, central auditory disorder, and hearing handicap in elderly persons. *Journal of the American Academy of Audiology*, 7, 190-202.

Craig, C. H., Kim, B.W., Rhyner, P.M.P., & Chirillo, T.K.B. (1993). Effects of word predictability, child development, and aging on time-gated speech recognition performance. *Journal of Speech and Hearing Research*, 36(4), 832-841.

Crawford, J. R., Bryan, J., Luszcz, M. A., Obonsawin, M. C., & Stewart, L. (2000). The executive decline hypothesis of cognitive aging: Do executive deficits qualify as differential deficits and do they mediate age-related memory decline? *Aging, Neuropsychology, and Cognition*, 7(1), 9-31.

Darowski, E.S., Helder, E., Zacks, R.T., Hasher, L. & Hambrick, D.Z. (2008). Age-Related Differences in Cognition: The Role of Distraction Control. *Neuropsychology*, 22, 638-644.

Fogerty, D., Humes, L.E. & Kewley-Port, D. (2010). Auditory temporal-order processing of vowel sequences by young and elderly listeners. *Journal of the Acoustical Society of America*, 127(4), 2509-2520.

Foo, C., Rudner, M., Rönnberg, J., & Lunner, T. (2007). Recognition of speech in noise with new hearing instrument compression release settings requires explicit cognitive storage and processing capacity. *Journal of the American Academy of Audiology*, 18, 618-631.

Gatehouse, S., Naylor, G., & Elberling, C. (2006). Linear and non-linear hearing aid fittings--1. Patterns of benefit. *International Journal of Audiology*, 45, 130-152.
